

Recruitment Call

External Evaluator – ClinicalModelling Project

Project Summary

The ClinicalModelling project (<https://clinical-modelling.eu/>), funded under the ERASMUS-EDU-2022-PI-ALL-INNOV Programme, is a collaborative effort among nine partner organizations from four European countries: Portugal, Slovenia, Poland, and Spain. This consortium includes a diverse array of institutions, each bringing unique expertise and resources.

The main objectives of the project include equipping surgeons and nurses with the skills to use smart glasses to capture, edit, and analyze video images to support learning processes in the health sector, and strengthening students' competences. Additionally, the project aims to design new case studies for nursing master's and specialization courses.

The project's outcomes will be delivered through manuals, toolkits, and other educational assets, with activities including expert consultations, training courses, pilot tests, community meetings, and peer learning events.

Task Description

The external evaluation will be carried out during the mid-term and final milestones of the project. To ensure the execution of this service, an external evaluator will be subcontracted, whose identification, selection, and management will be coordinated by ESSSM and INOVA+, leaders of WP1.

The external evaluator is expected to have expertise in project evaluation and a deep knowledge of the program, and key aspects related to the project. The evaluation will primarily focus on the quality, relevance, innovation, and adequacy of the key deliverables produced by the consortium.

The strategies for collecting information may include questionnaires, participation in project meetings, and the promotion of focus groups or short meetings. The results of the external evaluation will be incorporated into the Monitoring and Quality Reports (D1.2), to be prepared between September 2024 and November 2025.

Candidate Profile

Research Field: Education Sciences, Health, Teaching Methods, Technology

Researcher Profile: Recognized Researcher (R2)

Position: External Evaluator

Degree Level: PhD

Language Requirement: English (C2 level)

Start Date: September 16, 2024

End Date: November 30, 2025

Working Hours: 250 hours

Work Locations: Primarily remote, with required attendance at two in-person meetings in Portugal and Slovenia.

Reports Timeframe: Two evaluation phases – September to November 2024 and August to November 2025

Responsibilities

- Attend two in-person meetings to discuss project progress.
- Develop a detailed proposal (up to 5 pages) for the external evaluation process.
- Assess and report on collaboration between project partners.
- Prepare interim and final evaluation reports for EU submission.
- Evaluate and provide feedback on VR resources and main project documents.
- Collect and analyze feedback from various stakeholders.

Selection criteria

1. Curriculum analysis
2. Work plan proposal analysis
3. Budget proposal

Application

We invite interested candidates to submit a detailed proposal, including their approach, budget, and relevant experience, along with a detailed CV.

We are excited to collaborate with a professional who can bring valuable insights and expertise to our project.

We would appreciate receiving your proposal **by September 9th, 2024**, to projetos@santamariasaude.pt. If you have any questions or need further information, please do not hesitate to contact us
